Welcome to Renewable Energy Skills

Renewable Energy Skills was established in 2004 to provide training and support to trades and professionals in the renewable energy sector. We are a FETAC registered training provider and offer SEI/REIA approved training. Renewable Energy Skills Skillnet continues to develop new courses and now offer training in building energy efficiency as well renewable energy technologies and is funded by member companies and Skillnets.

Looking for an Installer?

[List all](#)

To search for an installer:

Simply click in the box on your right and choose 'Contains Phrase' from the drop down menu.

Now you can search for a Renewable Energy System Installer if you know a Name, Company Name or even just your Town, City or County.

Please Note that the Users are currently confirming their details. Until this process is complete, the default value of "No" under the Services, Sector and Systems tabs may be incorrect.

RENEWABLE ENERGY SHOW, TRALEE

Learn all about Renewable Energy Show

The Renewable Energy Show is coming to Tralee this Sunday, the 7th of May. The show will demonstrate the wide range of renewable energy products and suppliers in the county - offering invaluable information to homeowners who hope to make a difference to the environment by installing renewable energy systems.

Sunday 7th May
BRANDON HOTEL, TRALEE
12 noon to 5.00pm

PROFESSIONALS HAVE THE KNOWLEDGE TO HELP YOU GO GREEN. ASK THE EXPERTS.

Kerry County Council's Environmental Office has welcomed the show to Tralee. "We are supportive of all initiatives to do with renewable energy," said Gerard O'Brien from the Environmental Office. "With today's soaring oil prices and increasing concerns for the environment, we encourage everybody to out there about renewable energy sources." The show will be held in Brandon Hotel, Corriban, Tralee from 12 noon until 5pm. It is being hosted by the Blue Energy Club and Tralee Renewable Aid will feature a display from many of their members. "Our objective is to show, inform and encourage installation of renewable energy systems."
