

ENERGY SAVERS TIPS

Here are a few tips to help you save some energy and money!!

- **Heating System Control:** Use time & temperature control (savings of 10%).
- **Transport:** Change your car filters (air, fuel & oil) regularly. Blocked filters add over 10% to your fuel consumption.
- **Renewables:** Store your timber fuel in shed/garage to keep it dry (<35% moisture).

CHRISTMAS GIFT IDEAS

Give a gift that keeps on giving.

Help the environment this Christmas.

- **Under €10:** Thermal clothing, underdoor draught excluders, draught excluder self adhesive tape, energy saving thermometer, heating pads.
- **Under €50:** Plug in electricity monitor, hot water cylinder jacket, radiator heat reflector foil, outdoor solar lights, solar radio or battery charger, remote control socket switches & LED lights, oil tank gauge, plug in thermostat.
- **Under €100:** Wireless electricity monitor, wireless oil tank gauge & alarm.
- **Over €100:** Household appliances with **A** or **A+** energy label, battery charging power station.

FESTIVE SEASON POINTERS

How to stay safe and keep your energy bills down over the Christmas:

- Do not overload electrical sockets. Switch off sockets and extension leads when they are not in use.
- Do not leave indoor or outdoor lighting on all night since it is unsafe and costly.
- Consider using some outdoor solar lighting for your house and garden.
- Be prepared for freezing temperatures; insulate your attic and pipes to prevent frozen pipes.
- Park your car in a garage if possible to avoid the need to run the car to defrost the windscreen, etc. Check that there is sufficient anti-freeze in your car also.
- Shop Around: The cost of fuel can vary by as much as 20% from filling station to filling station.
- Check on elderly neighbours if you can to ensure they are safe and warm enough.

Have a Safe & Happy Christmas
